INFECTION CONTROL ACTIONS

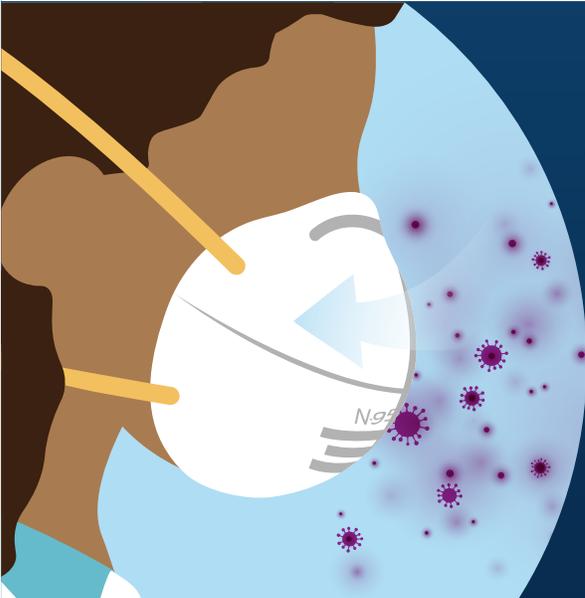

for COVID-19 **STILL WORK FOR DELTA**

**THE DELTA VARIANT
STILL SPREADS
BY RESPIRATORY
DROPLETS,
VERY LARGE TO VERY SMALL.**

**MASKS
STILL
BLOCK
THESE
DROPLETS.**

**When used correctly,
N95 RESPIRATORS
STILL FILTER**

respiratory
droplets
as air is
breathed
**IN &
OUT.**

**WEARING MASKS &
N95 RESPIRATORS
IN HEALTHCARE FACILITIES**

**WILL STILL
PROTECT
YOU,**

*your patients, &
your coworkers
from the spread
of COVID-19,
including the
Delta variant.*

The recommended healthcare

INFECTION CONTROL ACTIONS

for COVID-19 **STILL WORK FOR DELTA**

THE DELTA VARIANT STILL HAS THE SAME BASIC STRUCTURE

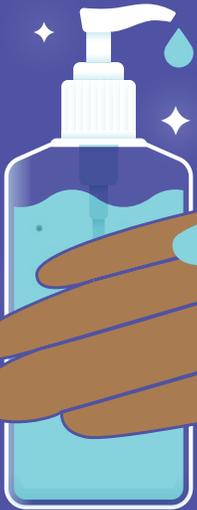

OF THE SARS-COV-2 VIRUS which includes a fatty envelope that surrounds it.

This means that **CLEANING & DISINFECTION STILL WORK EFFECTIVELY.**

HOW?

ALCOHOL-BASED SANITIZER

DISSOLVES THE FATTY ENVELOPE, DESTROYING THE VIRUS.

HAND HYGIENE

ENVIRONMENTAL DISINFECTION

SOAP

SURROUNDS THE VIRUS, AND WATER CARRIES IT OFF THE SKIN.

DISINFECTING PRODUCTS ON EPA'S LIST N

DISSOLVE THE FATTY ENVELOPE, DESTROYING THE VIRUS.
